Projects

LinguaPay	Mar 2025 – Jun 2025
GitHub: github.com/navya-thottempudi/Linguapay Live: linguapay-ay2o.vercel.app	

- **Tech Stack:** React, Flask, REST APIs
- Built and deployed a multilingual language and currency platform supporting 103 languages and 31 currencies, combining translation, speech, currency conversion, and weekly exchange-rate analysis.
- Integrated the Frankfurter API for currency conversion and 7-day historical exchange-rate analysis, processing API responses through Flask backend services.
- Developed 4 Flask REST endpoints with request validation and failure handling, returning structured JSON responses and appropriate HTTP status codes.

AI Assistant Web Application

Apr 2026 – Apr 2026

- **Tech Stack:** React, Node.js, Express, MongoDB, REST APIs
- Engineered a full-stack LLM application using React and Node.js/Express, integrating Groq's Llama 3.1 8B model for interactive question answering.
- Implemented persistent chat history with MongoDB Atlas, storing user/AI exchanges and retrieving the 20 most recent chat exchanges through a REST endpoint.
- Designed a backend service layer for request validation and LLM API integration, with Groq and database credentials managed through environment variables.

SkillPath AI – AI Learning Roadmap Generator

Jul 2026 –Jul 2026

- **Tech Stack:** HTML, CSS, JavaScript, Node.js, Express.js, Google Gemini API
- Created an AI-powered personalized learning roadmap generator using Gemini 2.5 Flash, tailoring plans to career goals, skill level, weekly study hours, and resource preferences.
- Engineered structured JSON LLM outputs containing learning phases, durations, skills, projects, resources, and career outcomes for roadmap rendering.
- Added localStorage-based persistence to preserve the latest roadmap and maintain a history of generated learning plans.
